PROFILE

To continuously be challenged, to learn and grow in ways that enhance my development into an innovative and respected business leader.

Having been engaged by global multinationals and national enterprises, I have directed cross-functional teams through complex, agile enterprise initiatives, driving effective change management and delivering robust enterprise architecture alongside integrated technological solutions. I am committed to advancing organisational objectives through the strategic alignment of business operations with the evolving ICT landscape, leveraging extensive experiential insight, analytical acumen, and sophisticated interpersonal skills.

EXPERIENCE

Head of Technology

Dec 2020 – Present

Wisir Finance

Holds primary accountability for comprehensive technological outcomes, encompassing security, organisational resilience, and quality of delivery. Oversees the technology operating model governing how platforms are built, operated, monitored, and continuously improved, while serving as the principal liaison between the executive leadership team and the technology department.

KEY RESPONSIBILITIES

- Formulate the organisational technology strategy and execution framework, ensuring alignment with corporate growth objectives and critical delivery milestones.
- Provide strategic leadership across technical design, engineering, DevSecOps, quality assurance, data analytics, and enterprise architecture.
- Direct the end-to-end software development lifecycle with robust delivery governance, rigorous estimation disciplines, and comprehensive capacity planning.
- Govern cybersecurity operations and risk mitigation to ensure strict adherence to CIS controls, ISO 27001, and ISO 42001 standards.
- Spearhead strategic initiatives to enhance operational efficiency through the integration of artificial intelligence and automation.
- Manage the technical debt strategy and governance, and exercise full accountability for the technology department's financial budget and resource allocation.

NOTABLE ACHIEVEMENTS

- Directed the technical execution for the deployment of Generative AI, using LLM agents and agentic AI to automate credit decisioning services, leveraging foundational models from Azure AI Foundry and AWS Bedrock.
- Executed comprehensive cost optimisation strategies and led software contract negotiations, resulting in approximately **\$200,000** in fiscal savings for the organisation.

Business IT Manager

Nov 2018 – Dec 2020

Skretting Australia

Held primary responsibility for executing the IT Strategy and sustaining technological infrastructure. Through the identification, scoping, and evaluation of strategic technologies, ensured the successful implementation of solutions, technical support, and process enhancements to optimise organisational productivity and operational efficiency.

KEY RESPONSIBILITIES

- Architected and executed the organisational IT Strategy, including the implementation of the 8Q Roadmap.
- Held primary accountability for the enterprise IT program, ensuring delivery of technical projects in strict alignment with global strategic objectives.
- Directed the lifecycle of the Infor M3 ERP system, overseeing the deployment of M3 Unite across all business units, with comprehensive user training and standardised governance procedures.
- Exercised fiscal stewardship over the IT budget, managing capital and operational expenditure, inventory procurement, and service delivery expectations.
- Engineered robust compliance frameworks, business continuity plans, and disaster recovery protocols, formalising key IT risk management controls.

NOTABLE ACHIEVEMENTS

- Directed the implementation of IT infrastructure and the comprehensive rollout of the M3 ERP system at a new site in Westbury, TAS.
- Spearheaded an eCommerce solution featuring an automated ordering platform for efficient customer stock and inventory management.
- Delivered manufacturing intelligence solutions by capturing and analysing production data through Power BI.

Business & Technology Consultant

Oct 2015 – Nov 2018

ICT Innovations Pty Ltd**KEY RESPONSIBILITIES**

- Spearheaded the Business Intelligence team delivering the IBM Cognos TM1 student load and fee revenue planning system, supporting the University of Sydney's planning, forecasting, and budgeting cycles.
- Directed the data project team to ensure timely submission of the 2018 ERA SEER research and academic excellence report to the Australian Research Council within strict regulatory deadlines.
- Managed the full project lifecycle, conceptualisation, solution architecture, development, rigorous testing, and final implementation.
- Provided end-to-end project management for the development, deployment, and administration of the Salesforce.com platform, liaising with stakeholders and vendors on functional designs and bespoke customisations.

NOTABLE ACHIEVEMENTS

- Directed the successful integration and deployment of Salesforce.com CRM for Redback Conferencing.
- Managed delivery of the ERA SEER 2018 research and academic excellence submission to the Australian Research Council.
- Led the end-to-end implementation of the IBM Cognos TM1 planning system for the University of Technology Sydney.
